

Modulo Tratamiento de Datos

GFT

Pedro Nieto

Esteban Chiner

Roberto López

Miguel Angel Sotomayor

Ruben Sanchís

The Team

Pedro Nieto

- **Computer Engineer** from the Universidad de Oviedo
- Working in GFT as a **Senior Data Specialist** specialized in Data Management and IoT
- Part of the technological **Business Development** team
- Leading the **IoT area and Industry sector**

Personal:

- **Freaky Proud**
- Father of **two**
- Owner of **Raspberry Pi** (1,2, 3 and Zero)
- **Technology Evangelist**

Pedro.nieto@gft.com

Esteban Chiner

- **Computer Engineer** from the Universitat de València & **Master on Software Engineering** from Universitat Politècnica de València

- Working in GFT as a **Senior Architect** specialized in Big Data and Blockchain

- Part of the technological **Business Development** team

- Leading the “**Artificial Intelligence & IoT**” and “**DLT & Blockchain**” domains

- **Lecturer**

- Big Data & Analytics Master (**UPV**) – “Big Data Architectures in Financial Services”
- Seminari d’Empresa (**UPC**) – “Developing decentralized apps with Ethereum”
- Data Analytics for Enterprises (**EDEM**)

- **Hadoop Certified** in developer, administration and Hbase

- Paper published: “**A Big Data Financial Information Management Architecture for Global Banking**”

@echiner

echiner

esteban.chiner@gft.com

Roberto López

- **Computer Engineer & Master on Distributed Computing** from Polytechnic University of Valencia
- On **GFT since 2009** working as a **Senior Software Engineer** specialized in Big Data and Artificial Intelligence
- Leading **Fast Data Domain**
- **Lecturer**
 - Big Data & Analytics Master (**UPV**) – “Big Data Architectures in Financial Services”
 - Data Analytics for Enterprises (**EDEM**)
- **Hadoop Developer Certified**
- **Google Cloud Data Engineer Certified**

Hablemos de datos...

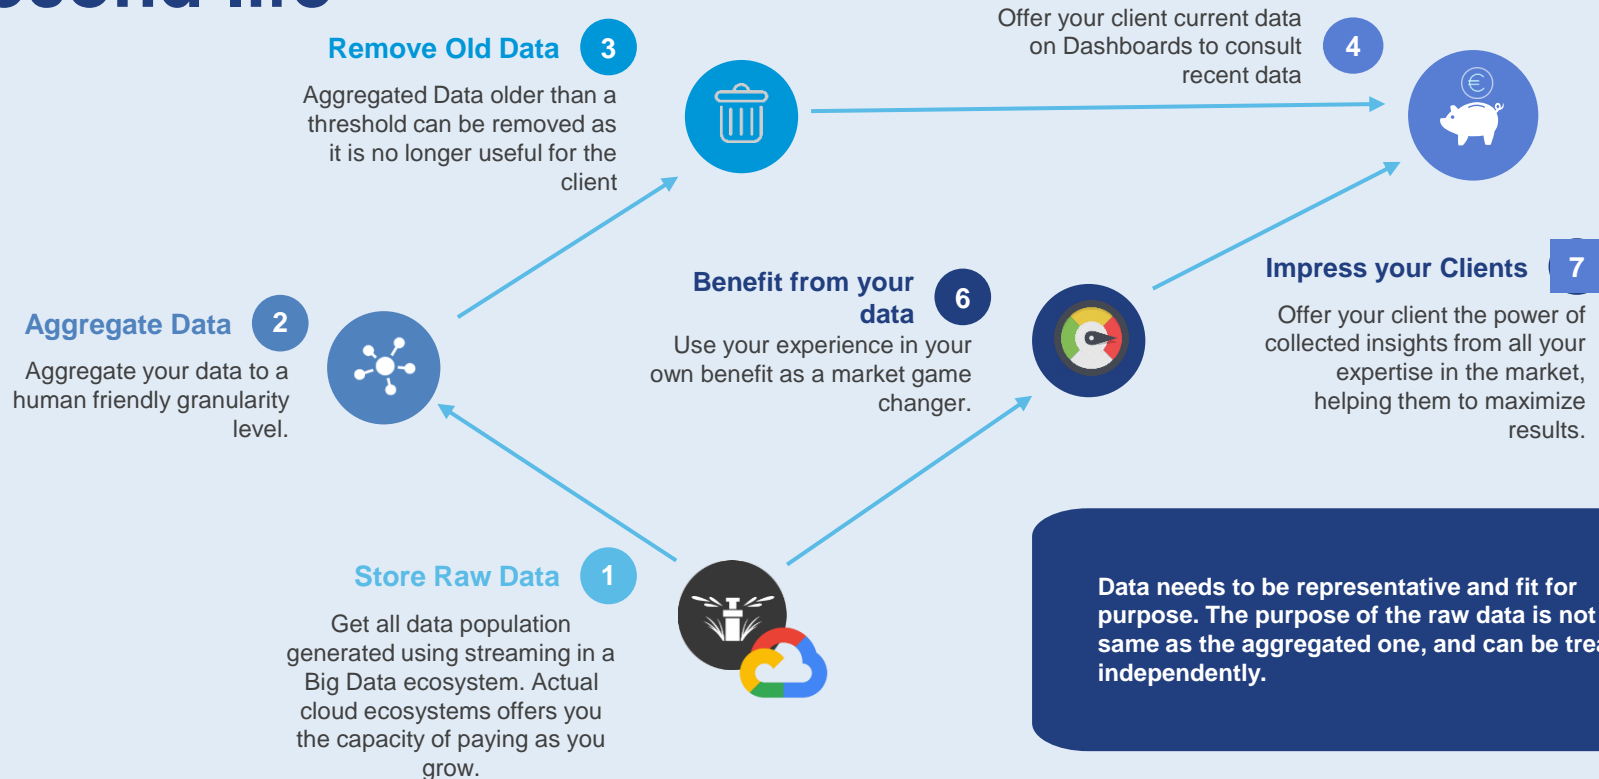

Our journey in Data

No son solo los datos...

Give your data a second life

Everywhere...

What all of
them have
in
common?

Data as an Asset

Puzzle starts to fit

Data Evolution

Where are you?

Companies are evolving to embrace smart industry, as an IT company we can help you succeed in the process.

Data

Environments usually on premise store small amounts of data for transactional purposes

- Optimize Transactional Environment
- Identify weak points in your technical approach

Information

Historical Data and innovative data sources start to gain attention in the ecosystem and are stored.

- Platform Strategy (Cloud)
- IoT Integration
- Reporting Dashboards
- Process Optimization

Knowledge

Use your experience in your own benefit as a market game changer. Squeeze your data with ML and get valuable insights.

- Business Rules
- Decision Support Systems
- Machine Learning Models
- Predictive Analysis

Wisdom

Offer your new view to your clients and predict or suggest new actions.

- Model Prediction
- Process Automation
- DAAS (Data as a Service)

LinkedIn Learning

The Skills Companies Need Most in 2020

Top 5 Soft Skills

- 1 Creativity
- 2 Persuasion
- 3 Collaboration
- 4 Adaptability
- 5 Emotional intelligence

Top 10 Hard Skills

- 1 Blockchain
- 2 Cloud computing
- 3 Analytical reasoning
- 4 Artificial intelligence
- 5 UX design
- 6 Business analysis
- 7 Affiliate marketing
- 8 Sales
- 9 Scientific computing
- 10 Video production

Business Value Forecast by AI Type

Consultores de Social Selling

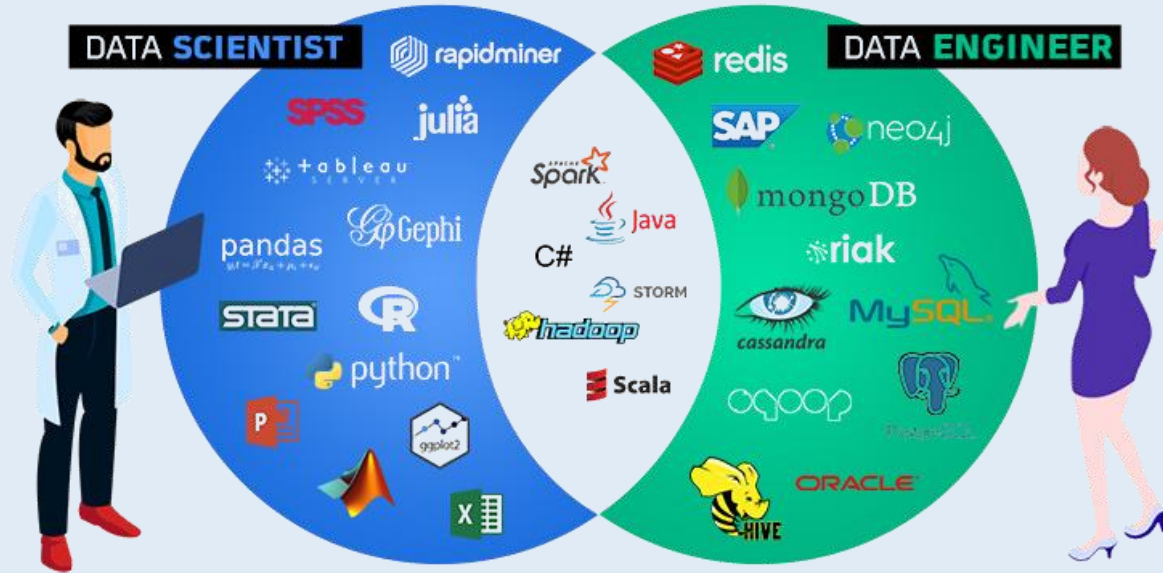

What do we expect from you?

Data Scientist also known as Data Managers, statisticians.	Data Engineers also known as database administrators and data architects.	Data Analysts also known as business Analysts.
		
A data scientist will be able to take data science projects from end to end. They can help store large amounts of data, create predictive modelling processes and present the findings.	They are versatile generalists who use computer science to help process large datasets. They typically focus on coding, cleaning up data sets, and implementing requests that come from data scientists.	They typically help people from across the company understand specific queries with charts.
Skills: Mathematics, Programming, Communication	Skills: Programming, Mathematics, Big data	Skills: Statistics, Communication, Business knowledge
  	  	  
Will use programmes such as: SQL, Python, R	Will use programmes such as: Hadoop, NoSQL, and Python	Will use programmes such as: Excel, Tableau, SQL

Data Engineers

What Will you learn?

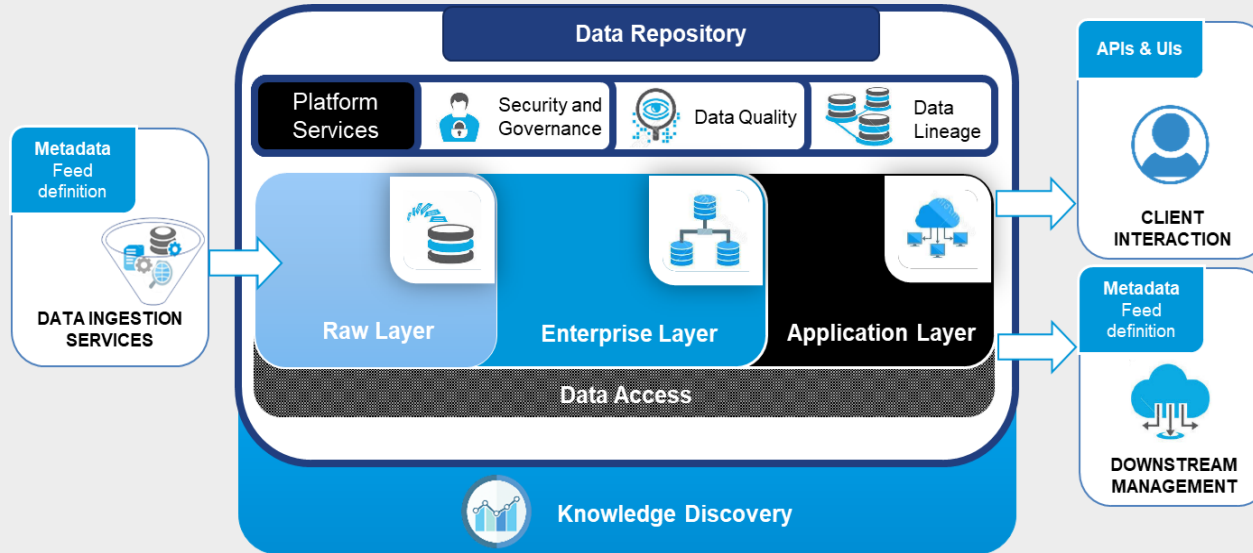

LANGUAGES, TOOLS AND SOFTWARE

Módulo 1

Data Architecture example

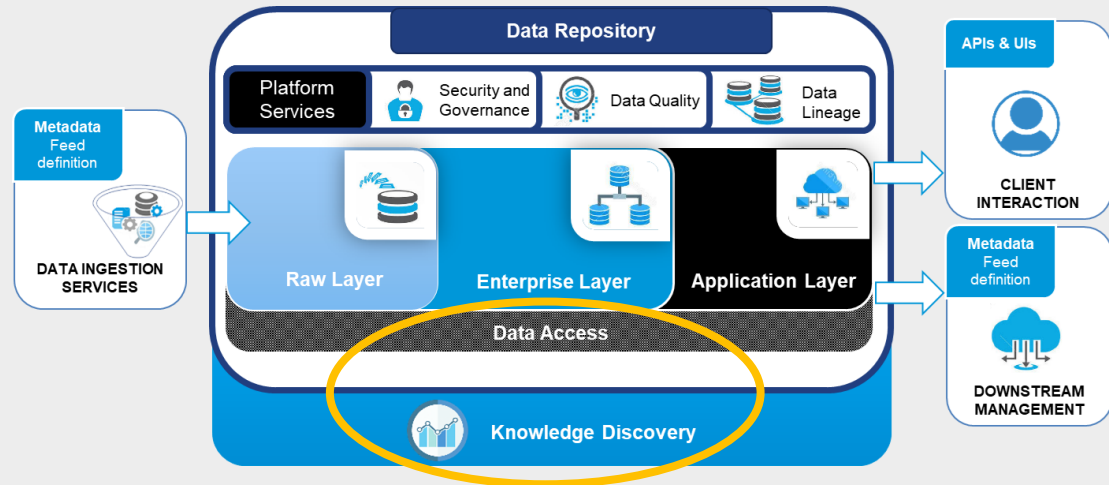

Get the data

- Data should be easily obtained, and frequently updated
- Data can come in any format or shape
- Be ready for all speeds (from batch to real-time)
- Data as a service

Data discovery

- We want to get not only the data, but the right data, and from the right source
- What data do we have?
- Is it relevant and enough?
- Is external or reference data required?
- Is it updated?

Captura y Recogida Datos

- **Unidad 1: Introducción a los Datos**
- **Unidad 2: Tipos de Datos**
 - Estructurados
 - No Estructurados
 - Semi-estructurados
- **Unidad 3: Integración de Fuentes**
 - Internal Data Sources
 - External Data Sources
 - Data Sources Access
- **Unidad 4: Frecuencia de Creación**
 - Batch Sources
 - Micro-batching
 - Streaming Sources

Captura y Recogida Datos

- **Unidad 5: Ingestión de Datos**

- ETL
- Ingestión Pura
- Basada en Eventos

- **Unidad 6: Tipos de Fuentes**

- Open Data
- Public DataSets
- Data as a Service

Prepare the data

- Maximize analysts time by having the data ready
- Data transformations
- Filtering
- Data quality checks
- Enrichment
- Use a common repository

Almacenamiento y procesamiento

- Unidad 1: Arquitecturas de Datos
 - Batch Architectures
 - Real Time Architectures
 - Lambda & Kappa Architectures
- Unidad 2: Tipos de almacenamiento
 - BBDD Relacionales
 - BBDD No-SQL
 - Documentos Indexados
 - Sistemas almacenamiento columnar
 - Almacenamiento distribuido
 - Almacenamiento serializado

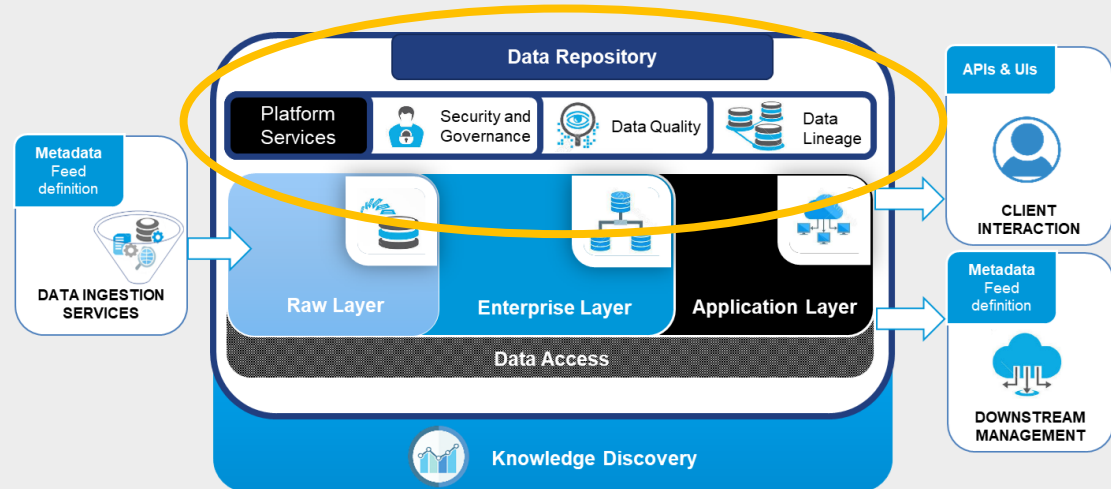

Almacenamiento y procesamiento

- Unidad 3: Procesamiento de Datos
 - Procesamiento en modo Batch
 - Procesamiento en Streaming
- Unidad 4: Privacidad y protección de Datos
- Unidad 5: Tipos de Infraestructuras
 - Cloud (IAAS, PAAS, SAAS)
 - On premises
 - Híbridas

Organize the data

- Separate and properly catalog the data
- Tag and complete with metadata
- Data stewardship

Gobierno del Dato

- Unidad 1: Origen del problema
 - Crecimiento Orgánico
 - Ciclo de vida de los datos
 - Data Oriented Architecture
- Unidad 2: Estándares de Mercado
- Unidad 3: Data Governance
 - Roles y Responsabilidades
 - Data Owner
 - Data Stewardship
 - Data Stakeholders
 - Comités y Funcionamiento
 - Herramientas de Mercado

Gobierno del Dato

- Unidad 4: Data Quality
 - Data profiling
 - Data curation
 - Reglas de calidad
 - Herramientas de mercado
- Unidad 5: Data lineage and Traceability
 - Glosario de términos & diccionario
 - Capa semántica
 - Linaje y trazabilidad
 - Flujos de trabajo
 - Herramientas de mercado
 - Data Stakeholders
 - Comités y Funcionamiento
 - Herramientas de Mercado

Gobierno del Dato

- Unidad 6: Éticas del dato y Seguridad
 - Ecosistema legal (GDPR)
 - Data masking y cifrado de datos
 - Datos sensibles
- Unidad 7: MDM y Reference Data
 - Metadatos
 - Visión 360
 - Reglas de supervivencia
 - Reglas de consolidación
- Unidad 8: Nuevos escenarios de datos
 - Datos como servicio (Daas)
 - Catálogos de datos
 - Casos Reales

Use the data

- Build reports
 - Help on decision support
- Visual dashboards
 - Control and monitor operations
- Build Machine Learning Model
 - Offer new products
 - Improve processes
 - Optimize production
